ALERT

You are about to trade a complex product and may be difficult to understand.

WHAT IS THIS PRODUCT?

Rolling FX Spot is a contract where the profit it to be secured or loss avoided by reference to fluctuations in an underlying currency pair, such the Euro (EUR) against the U.S. Dollar (USD), referred to as EURUSD, for immediate delivery.

OBJECTIVES

The objective of trading Rolling FX Spot is to gain exposure to fluctuations related to the underlying currency pair without owning it. Your return depends on the size of the performance (or movement) of the underlying currency pair and the size of your position. This product is entered into for the purpose of speculation or hedging and is commonly traded on margin. Margin refers to the use of a small amount of capital to support an investment of a larger exposure. Please note that margin trading requires extra caution, because you risk extensive losses if the price moves against you.

INTENDED RETAIL INVESTOR

Trading in this product will not be appropriate for everyone. This product would commonly be used by persons who want to generally gain short term exposures to financial instruments/markets; are using (trading with) money which they can afford to lose; have a diversified investment and savings portfolio; have a high risk tolerance; and understand the impact of and risks associated with margin trading.

TERM

Rolling FX Spot is an execution-only product and generally therefore has no recommended holding period. Rolling FX Spot trades do not settle. Instead, open positions held at the end of a trading day are rolled forward to the next available business day.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

LOWER RISK

HIGHER RISK

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level. Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies

This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. Trading risks are magnified by leverage – the total loss you may incur may significantly exceed the amount invested. Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and may also adversely affect your position. As a

result, margin calls may be made quickly or frequently. In the event of default, Fidus shall seek to immediately terminate, cancel and close-out all or part of any outstanding positions. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.
